

Broken Images Throughout the Site

- **Issue:** All product images, logos, and category images are using SVG placeholders instead of actual images

❖ How to fix

Fix Required -: Ensure images are properly loaded. This appears to be a lazy-loading issue or broken image paths.

Performance Issues

- Built on WordPress with WooCommerce
- Uses lazy loading for images (but broken)
- Product Variety: Good range of authentic regional products
- Clear Categorization: Logical category structure
- Price Transparency: Shows price ranges clearly
